

Opinion Column:

How does science relate to Christianity? If you listen to secular media or follow evolutionary scientists, you may be led to think that science contradicts Christianity. However, science and Christianity actually support each other. There could be a lot of reasons, but we are going to touch on three reasons.

Christianity gave rise to Modern Science. Christian scientists like Johannes Kepler, Blaise Pascal, Sir Isaac Newton, and many others helped to expand our understanding of the world, as well as developing the modern scientific method. They believed the Bible's account that God created the world. Therefore, humans can lead to the view that He arranged for humans to know the world and take care of the world. It's our job to explore this world. This is underwritten by the doctrine of *imago dei* (the image of God in humans).

All scientists exercise faith. No human was present at the beginning of the universe, so scientists can only make a guess. Of course, there is The Big Bang Theory that believes that the universe as we know started with an infinitely hot and dense single point; but this theory must exercise faith in infinite time and space. We still need eyewitness testimony. And only one person was present to tell us what it is. According to Time.com, "As The incredible fine-tuning of the universe presents the most powerful argument for the existence of an immanent creative entity we may well call God."¹

Science supports Christianity. Archeology and ancient studies confirm the accounts of the stories about Israel in the Old Testament. Historians like Josephus and Tacitus reference Christians in a way that matches the New Testament. Finally, the Bible's records align with scientific theories, including the idea that the earth is suspended in space, that the earth revolves around the sun, and water goes in an unending cycle.

As Mr. Penland, our science teacher, says "As a Christian we are supposed to know about God's creation. If we as Christians hold a proper biblical worldview then every idea and/or project should come from that belief."

- Sara V., with input from Genesis P. and Siri T.

FCS SCHOOL LIFE

Visiting 3rd Grade!

MS. LEE (3RD GRADE TEACHER)

Q1. What is the best thing about teaching?

Seeing students progress and grow in their studies

Q2. Describe the 3rd grade class in 3 words:

Silly, motivated, and very fun.

3RD GRADE STUDENTS

Q1. What is it like having Mrs Lee as a teacher?

- Very nice, serious and fun to have her
- It's good to have her as a teacher.

Q2. What is the best part about school?

- Studying and getting good grades on tests.
- Playing with my friends.

Q3: What games do you play in school?

- Monopoly, Connect Four, Guess-Who, Puzzles and Jenga.

Q4: What is your favorite subject? What are you learning in that subject?

- In math, we are learning about fractions, and in gym, we are learning how to play basketball and do exercises.

From what we've learned, 3rd grade is an amazing class, eager to learn new things from their amazing teacher Ms. Lee.

PERSONAL SPOTLIGHT

Mrs. Sarah Han serves as our school business manager and counselor. She has been working from home since her health problems began. It was recently her 2 year anniversary when she was first diagnosed with pancreatic cancer. She has stage 3 cancer and because of COVID, it's even harder to come to school. She's currently in chemotherapy which means her immune system is much more sensitive than usual. A typical cold for Mrs. Han would take her weeks to recover because of how sensitive her immune system is.

According to Mrs. Sarah Han, she is overcoming her struggles by the school's support of her during her difficult situation. FCS is a great supporter to Mrs. Han by giving her very flexible hours if she finishes her work. Another way she has been supported by FCS is that she can work from home by counseling students through zoom. All the support and flexibility from the school has helped her keep on overcoming her struggles.

Before Mrs. Han worked at FCS, she worked at Pastoral Counseling Center, a Christian counselor center that is located not very far from FCS. Eight years ago when this school needed a counselor for students, Mrs. Han was sent here by her supervisor. Then three years ago, when Mrs. Adams got sick, she was asked to work downstairs in the main office. And now she has to work from home and counsel students through zoom because of Covid and her cancer. We are very grateful even after all her health problems that she's part of our FCS community.

RUBE GOLDBERGS RULE!

1. What was the goal of your machine?
 - To turn on a light by touching tin foil
 - To put an egg and a spoon into a bowl
 - To open a garage door using a remote
2. What did you learn from this experience?
 - I learned how a light works.
 - I learned that nothing in life is easy and dominoes are difficult to stack.
 - Science is hard. Engineering and designing are hard.
 - I learned that perseverance and patience are virtues.
 - I learned that timing is very important.
3. What was your favorite step of your machine?
 - The beginning. A ball rolled down a ramp and hit a Jenga block.
 - My favorite step was when a HotWheel car went down a track ramp.
 - A golf ball rolled down some video game disks and knocked over a book that jerked fishing line and fired a Nerf gun.
 - Jenga blocks with a popsicle stick that fell and released a ping pong ball.

📖 Bible Verse 📖

Isaiah 41:13

For I, the LORD your GOD, hold your right hand;
It is I who say to you "Fear not, I am the one who helps you."

We've been wondering...

- 🤔 Why do people cut birdhouses... to make more birdhouses?
- 🤔 If two mind readers are reading each other's mind, whose mind are they reading?
- 🤔 Why do your fingers have fingertips but your toes don't have toe tips, and yet you can tiptoe but not tip finger?

🧩 Puzzle time! 🧩

Roman Numerals:

CML is _____
DCDLXXVI is _____
XLIII is _____

Fill in the blanks:

C _ _ C _ _ T _ C _ P _ O O _ _ E _
Solutions given next month.

Counting up to 10	
Counting down from 10	
Adding by 10s	
Subtracting by 10s	
Multiplying by 10s	
Dividing by 10s	
Realizing that 10 shouldn't be called 'ten' to begin with. It should be called 'onetey'.
